Simple example

```
.container {
  display: flex;
}

.container > div {
  flex: 1 1 auto;
}
```

Child

```
.container > div {

  /* This: */
  flex: 1 0 auto;

  /* Is equivalent to this: */
  flex-grow: 1;
  flex-shrink: 0;
  flex-basis: auto;

  order: 1;

  align-self: flex-start; /* left */
  margin-left: auto;      /* right */

}
```

Container

```
.container {

  display: flex;
  display: inline-flex;

  flex-direction: row;           /* ltr - default */
  flex-direction: row-reverse;   /* rtl */
  flex-direction: column;        /* top-bottom */
  flex-direction: column-reverse; /* bottom-top */

  flex-wrap: nowrap; /* one-line */
  flex-wrap: wrap;   /* multi-line */

  align-items: flex-start; /* vertical-align to top */
  align-items: flex-end;   /* vertical-align to bottom */
  align-items: center;     /* vertical-align to center */
  align-items: stretch;   /* same height on all (default) */

  justify-content: flex-start; /* horizontal alignment - default */
  justify-content: flex-end;
  justify-content: center;

}
```

Tricks

Vertical center

```
.container {
  display: flex;
}

.container > div {
  width: 100px;
  height: 100px;
  margin: auto;
}
```

Mobile layout

```
.container {
  display: flex;
  flex-direction: column;
}

.container > .top {
  flex: 0 0 100px;
}

.container > .content {
  flex: 1 0 auto;
}
```

A fixed-height top bar and a dynamic-height content area.

Vertical

```
.container {
  align-items: center;
}
```

Vertical center (2)

```
.container {
  display: flex;
  align-items: center;    /* vertical */
  justify-content: center; /* horizontal */
}
```

Reordering

```
.container > .top {
  order: 1;
}

.container > .bottom {
  order: 2;
}
```

Table-like

```
.container {
  display: flex;
}

/* the 'px' values here are just suggested percentages */
.container > .checkbox { flex: 1 0 20px; }
.container > .subject { flex: 1 0 400px; }
.container > .date    { flex: 1 0 120px; }
```

This creates columns that have different widths, but size accordingly according to the circumstances.

Left and right

Vertically-center all items.

```
.menu > .left { align-self: flex-start; }  
.menu > .right { align-self: flex-end; }
```
